

FM Graham Integral Blind Unit

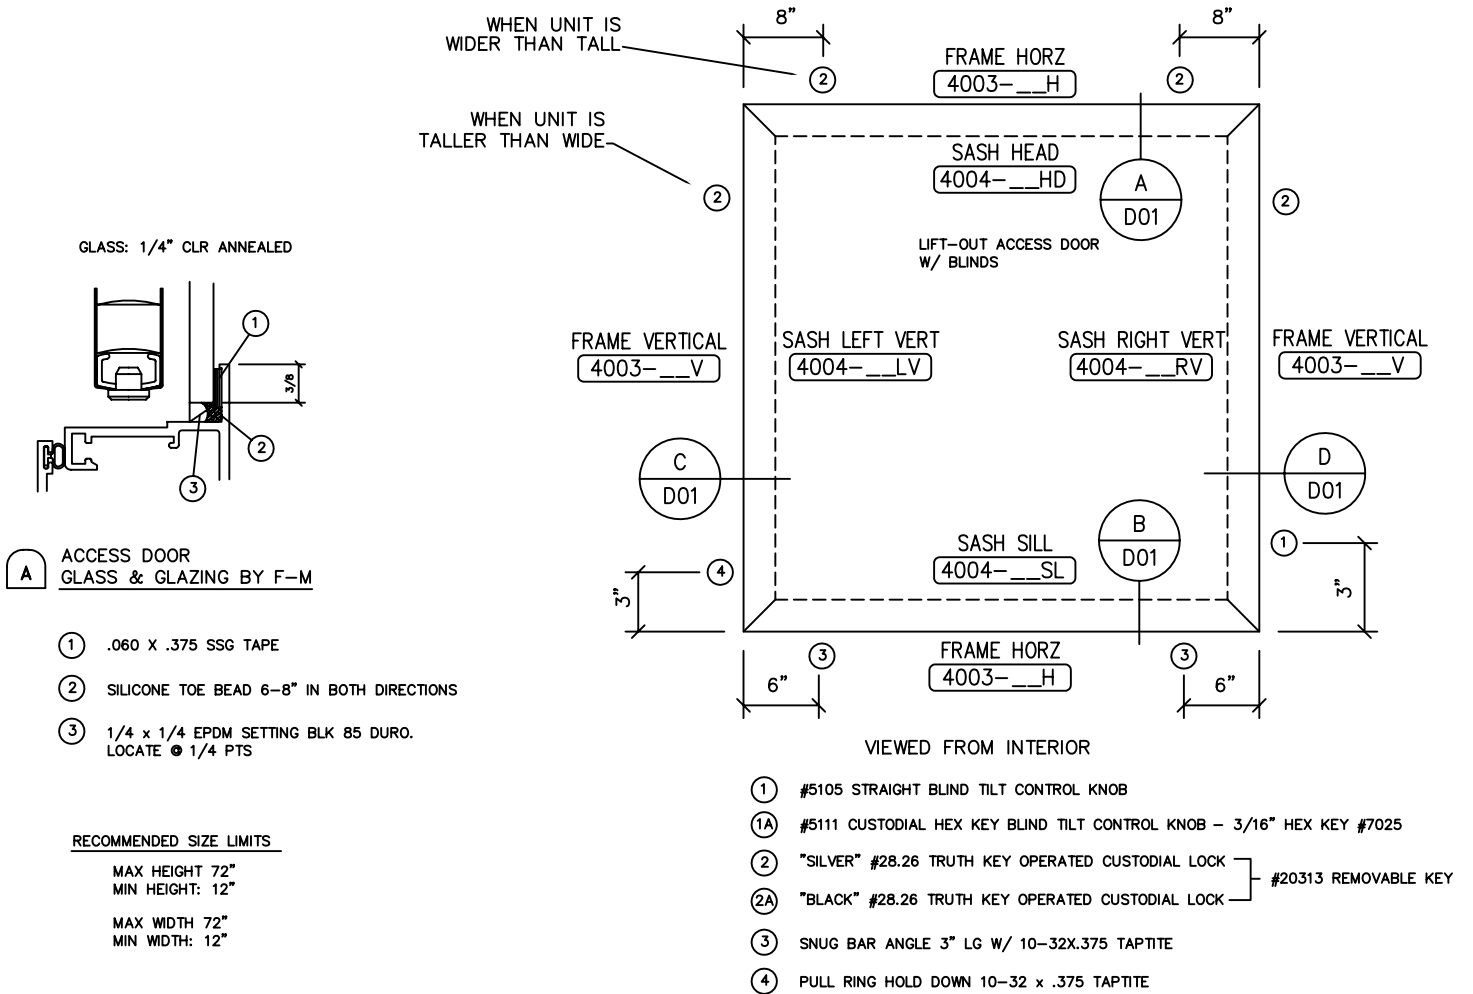

The F-M Integral Blind is designed as an accessory that can be installed into any of FM's Curtain wall systems. The sub-frame and integral blind panel are both field installed. It has a face depth of 1 7/8" and a frame depth of 1 7/8".

There are two types of control knobs and two colors of custodial locks available. The integral blind panel incorporates 1/4" tempered glass with venetian blind slats offered in 5/8" or 1". There are sixteen standard colors of blind slats to select from.

The mitered corners of the framing incorporate a corner key for a firm and tight joint. The Integral Blind comes glazed from our factory and the sub-frame fabricated. Also with the blind, custodial lock and tilt control knob installed. The removable integral blind allows for easy access to the curtain wall glass for tasks such as cleaning.
