### **Graham Acquires Keystone's Assets**

*Graham Architectural Products announced today that wholly owned subsidiary, Graham Thermal Products, LLC has purchased assets of Keystone Industries*

**York, PA, ([www.grahamwindows.com](http://www.grahamwindows.com))** – [Graham Architectural Products](http://www.grahamwindows.com) (GAP), a leading manufacturer of architectural-grade windows, doors, and curtain wall, based in York, PA, announced today that a wholly-owned subsidiary, Graham Thermal Products, LLC, has acquired from the secured lender the product lines, test reports, intellectual property, inventory, machinery, and equipment of Keystone Industries Window and Screen Systems, Inc., a New Castle, PA, based manufacturer of commercial and energy-efficient thermal window systems and related products. Michael DeRosa, the co-founder of Keystone, will be joining Graham Thermal Products as its president reporting to Brian Hurley, CEO of Graham Architectural Products. Michael brings to Graham over 21 years of experience in innovative product design and manufacturing.

Graham Thermal Products will operate as a subsidiary of Graham Architectural in a newly leased 45,000 square-foot facility in New Castle, PA, and employ approximately 45 people, many of which were formerly employed by Keystone.

“While the challenging economic times have taken a hard toll on the entire architectural window and fenestration industry, we are very pleased to acquire the product lines and assets of Keystone and to employ such a knowledgeable and talented industry veteran in Michael DeRosa. We are confident that we can bring greater distribution to an excellent complementary and competitive product line and grow Graham Thermal Products accordingly,” said Brian Hurley, CEO.

#### **About Graham Architectural Products:**

Graham Architectural Products was founded in 1960 as part of Graham Engineering and is a leading supplier of architectural windows. Graham is renowned for its leadership in historical reproductions and its high quality and has enjoyed the reputation of being an engineering company that manufactures custom replacement windows. Over the years, Graham has added to its offering a wide variety of custom and specialty products including acoustical products and ballistic-resistant, blast-resistant, and hurricane-resistant windows. Most recently, Graham introduced its innovative GThurm fiberglass reinforced polyurethane architectural window that provides superior thermal performance. In 2009, Graham acquired FM Enterprises, now FM Graham, a curtainwall manufacturer in Merrill, WI. Graham Architectural Products is part of the Graham Group of York, PA, and industrial and investment concern with global interests in plastics, packaging, machinery, building products, and outsource manufacturing ([www.thegrahamgroup.com](http://www.thegrahamgroup.com)).
