FOR IMMEDIATE RELEASE

Graham Architectural Products completes acquisition of FM Enterprises

Graham Architectural Products and FM Enterprises join to form full service architectural window manufacturer.

York, PA, July 17, 2009: Graham Architectural Products (GAP) of York, PA, a leading manufacturer of architectural grade windows and doors, announced today the completion of the acquisition of FM Enterprises, a Merrill Wisconsin based manufacturer of curtain wall windows, storefront windows and doors, and sunshades. This strategic acquisition brings together a complement of operating windows and curtain wall products giving GAP a complete offering of architectural and commercial fenestration products to better serve the industry. The newly formed entity, *FM Enterprises, A Graham Architectural Company* will operate under the GAP banner.

GAP President and CEO, Brian Hurley made the announcement today saying, "FM is an excellent fit in both product and corporate culture for GAP. FM's product offering is precisely what we were looking for strategically to provide our valued customers with a well rounded product line. We are also excited to have the availability of a skilled workforce that the Merrill WI area can offer to GAP for future expansion opportunities. The addition of FM's products to our portfolio will enable us to better serve our customers by allowing us to supply the entire job from a single source, something that's important to many of our customers."

FM Enterprises will continue to operate as a GAP subsidiary from its 100,000 square foot facility in Merrill, Wisconsin where it employs 33 people. Todd Frederick will continue as FM's president where he will maintain a roll-over equity position in the newly formed company. Frederick, comments, "The core values of product quality, innovation, and long-term customer relationships, are similar for both companies which provides us with a strong foundation for future success. Becoming part of Graham will open up new opportunities in markets where we had limited success in the past. I expect this to be a big boost to our business for both the short and long term". Todd and his highly skilled management team will continue to oversee the day to day operations in their current capacity.

FM Enterprises was established in 1997, in Merrill Wisconsin and manufactures curtain wall, pressure wall, storefront, sunshades and window wall for a wide variety of architectural applications. Graham Architectural Products began manufacturing windows in 1972 and is a leading supplier of architectural windows for historical, schools and universities, blast mitigation and ballistic, hurricane/impact resistant, and acoustical applications. Graham Architectural Products is part of the Graham Group of York, Pennsylvania, an industrial and investment concern with global interests in plastics, packaging, machinery, building products and outsource manufacturing.
