Product

• 2500 Series Segmented Curtain Wall with Sunshades
(Approx. 15,000 ft²)

LEED® Certification

Silver

Project Description

The Pavilion at Philadelphia Community College includes three different Graham captured curtain wall profiles including 5", 7" and 8" depths. The front fascia is a segmented radius wall with custom perforated sunshades designed to filter afternoon light, reducing heat gain and energy consumption.

Completion Date

2008
