

Our Company

Graham Architectural Products is a manufacturer of architectural and commercial-grade windows, doors, and curtain wall systems. Our specialties include recreating historical windows of any size and shape using modern, energy-efficient designs and materials, blast mitigation, hurricane impact, and acoustical windows and doors for new and retrofit applications. We are equally adept with all retrofit and new applications. Most recently, we introduced our GThurm line of highly thermally efficient windows and curtain wall with U values as low as 0.15. Our clients include schools and universities, government and military installations, and a diverse commercial base. Our operating units include:

Graham Architectural Products (GAP), York, PA/New Castle, PA - windows and doors
Graham Architectural Products, Curtain Wall Solutions, Merrill, WI - curtain wall

Why Graham?

- ◆ Quality custom-designed and engineered products
- ◆ High-efficiency Green products
- ◆ Products available to help with LEED certification
- ◆ Custom drawings for proposals
- ◆ Shop drawing and calculations service
- ◆ Samples and mock-ups available
- ◆ Innovations in window design since 1960

Core Competencies

- ◆ Historical preservation and renovations
- ◆ New construction and replacement systems
- ◆ Schools and universities
- ◆ Blast mitigation, ballistic resistant, & hurricane impact
- ◆ Office structures and medical buildings

Products

- | | | |
|----------------------------|-----------------------------------|-------------------------------------|
| ◆ GThurm™ R7 windows | ◆ Terrace doors | ◆ Acoustic sound abatement windows |
